

SPECIAL NOTES

- (a) Shoulder Flashes and numerals and badges of rank where appropriate are to be worn on raincoats. The position is to be the same as that on the blouse. In the case of raglan raincoats, having no shoulder seam, it is suggested that the shoulder flashes and badges of rank should be positioned while the raincoat is being worn, so that the shoulder flash is $\frac{1}{4}$ " below the shoulder line and the badges of rank midway between the shoulder line and the elbow. On both the raincoat and blouse, the group numeral should have the upper edge adjoining the lower edge of the shoulder flash.* The Spitfire badges and Red Stars ARE NOT to be worn on raincoats.
- (b) Centre of Spitfire badge as in A and centre of badge of rank in B, C, D, and E should be midway between shoulder seam and elbow.
- (c) NCOs with Spitfire should have lower edge of spitfire badge adjoining upper edge of badge of rank as in C overleaf.
- (d) In the cases shown at D, and E, all badge edges adjoin each other.

*There should be no gap between the two
